ARENAGRIP™ BY BACHER

Engineered Equestrian Surfaces

CREATING THE PERFECT EQUESTRIAN SURFACE IS AS EASY AS **ABC**

ARENAGRIP™ **BACHER** **CUSTOMIZE**

Customized **ARENAGRIP™**-Engineered Equestrian Surface Systems for indoor and outdoor arenas are installed using several **ARENAGRIP™** components:

- GeoTextile
- Fibers
- PVC mats (for optimized drainage)
- Locally-available sand
- **ARENAGRIP™** arena enclosure systems
- Specific machinery for installing and maintaining the arena

Our goal is to consistently install the highest quality Engineered Equestrian Systems

At **BACHER GROUP™**, customized means all **ARENAGRIP™** components are installed to meet your specific requirements, taking into consideration environmental factors such as climate, ground conditions, available sand, etc.

ARENAGRIP™ Engineered Equestrian Surface Systems **HAVE “OLYMPIC” QUALITY** **AS SEEN IN ATHENS IN 2004** **AND HONG KONG IN 2008.**

Wolfgang Bacher is a passionate equestrian enthusiast with more than 30 years experience in building horse arenas. Continuing relationships with the German equestrian elite as well as leading research institutions and universities is important for **BACHER GROUP™** in order to continue to develop the highest quality and most up-to-date specifics for equestrian surface arenas. Successful around the globe, stainable, custom-made, for use during all four seasons.

Your project is in the best hands with **BACHER GROUP™**. We provide:

- Specific consultation
- Accurate assortment and evaluation of construction components (sand grading)
- Planning and optimal combination of several components that will make your equestrian surface unique
- Coordination and supervision of the entire project

BACHER GROUP™
DEVELOPER,
PRODUCER
AND DISTRIBUTOR
of high-quality components
for equestrian arenas

- **ARENAGRIP™ GeoTextile** is a combination of pure polyester flakes and fibers cut to exact dimensions. The right mixture of sand, with a specific range of particle sizes and different types of geotextiles, helps to create the perfect equestrian surface for dressage, jumping hunting, western riding and race tracks.
- **ARENAGRIP™ PVC Mats** are specially designed to give your horse optimal grip. They absorb shocks, reduces stress to joints, ankles, tendons and muscles. They help to avoid slipping, thus significantly reducing the risk of concussions and injuries. The Tank-Dread™ pattern is engineered and structured in such a way that the right moisture level is provided and surplus water is drained to the subsurface.

ARENAGRIP™ Engineered Equestrian Surfaces are heat and frost resistant, elastic and dustless, even in dry circumstances and save water and stay moist longer.
